

SOFTWARE TRIALS FOR SMALL TEAMS

Stop picking software from the demo.

Use a 5-test scorecard. Swipe »

STEP 1

Pick ONE workflow first

Not “improve productivity”. Write the actual job: capture an enquiry, assign an owner, schedule the follow-up.

STEP 2

Set pass/fail rules before you start

- 1 Access: each role sees only its data
- 2 Data: easy to import and export
- 3 Integrations work on your plan
- 4 Seats, limits and terms are OK

STEP 3

Run the same 5 tests in both

- 1 Normal task, start to finish
- 2 An exception (bad data)
- 3 A handoff to a colleague
- 4 The integration, incl. errors
- 5 Export: is it still usable?

STEP 4

Score 0–3 and weight it

- 1 Core task accuracy — 35%
- 2 Team usability — 25%
- 3 Integration reliability — 20%
- 4 Admin and exit — 20%

STEP 5

Count the real first-year cost

Seats, usage fees, paid integrations, setup hours and training. A “cheap” plan with 6 hours of setup isn’t cheap.
